

An Upskill Initiative: Functional Assessment in Long Term Care

Functional assessment is essential in long term care settings to evaluate changes in clients. This would allow therapists to accurately prescribe a suitable programme for the clients. As clients in this settings are medically stable, it is possible for therapy aides to conduct the assessment. This course aims to upskill therapy aides with the necessary skills and knowledge to perform assessment under therapist's instructions. Reassessment components includes range of motion, cognition and perceptual processing, functional mobility and activities of daily living.

COURSE DETAILS

10-12 January 2024
9 am to 5 pm
